ASTROLOGY SIGNS FOR USA STATES AND CITIES

Here is your free handout on the astrology of States, Cities, and a few countries.

For information on your personal power places, see the explanation for the EARTHLINES™ (AstroCartoGraphy®) Maps and Consultation at the bottom of this document. Definitions and terms associated with relocation astrology are also at the end of this document.

Following is a listing of Sun signs for several countries, states, and cities. **Be aware that some places will have more than one sun sign based upon differences in the data sources, political changes, and so forth.** For example, Portland, Oregon has at least two charts. Because of these common discrepancies in what is known as “mundane astrology,” the following data is provided to serve only as a general guide. **It is likely that there will be errors here.** There can be differences in the founding of a location, legal paperwork. In the case of countries, there can be dates when a revolution started, when a new leader took over, or even when the new constitution was confirmed. Check with your local astrology group to see if they have more specifics about your city. **If you don’t see your city here, try going to the local historical society to find an official date, then go to astro.com to cast the chart.**

If you know your own Sun sign, Moon sign, and Ascendant sign, look to see how you compare to your home state or city. Sun represents leadership and basic life force. Moon represents the people, emotions, and public attitudes. As a general rule, AIR signs (Gemini, Libra, and Aquarius) are compatible with FIRE signs (Aries, Leo, Sagittarius). WATER signs (Cancer, Scorpio, Pisces) are generally compatible with EARTH signs (Taurus, Virgo, Capricorn).

If you are compatible with the planetary energy of a particular location, it is much easier to enjoy your trip. Perhaps this explains why you can travel to a place that everyone loves, and you just don’t feel in harmony. For example, John Kerry lost Ohio in his failed Presidential campaign. Ohio has its Sun in Pisces, which challenges Kerry’s Sagittarius Sun, and Ohio’s Moon sign is in Gemini, which provides opposition to Sagittarius. Pisces can represent enlightenment or illusion, and there certainly seemed to be some illusion working at his failed presidential bid in Ohio. On the other hand, Kerry found Massachusetts with Sun and Moon in “open to innovative ideas” Aquarius to be a favorable location for his ideals.

If your natal Sun, Moon, or Ascendant are compatible with the Sun and Moon of locations listed below, you might enjoy a journey to one of these places. Of course, there are a variety of variables including the need to look at your entire natal chart before making a decision, your personal power lines in a location (see EARTHLINES™ information below), and the current transiting cycles that are affecting your natal chart when you travel. (Note: there is a **free astrology primer** to help you understand the basics of astrology- See **Another Freebie** below).

Most of this information comes from these books. There are more cities and countries in:

“Horoscopes of the US States and Cities” by Carolyn Dodson

“The Book of World Horoscopes” by Nicholas Campion.

USA Cancer Sun, Aquarius Moon (Rising sign is most likely to be Virgo based upon historical reference; however, astrologers also use Sagittarius, Scorpio, Libra, and Gemini rising charts, and even dates different than 7/4/1776)

Washington DC 1791, Sun Pisces, Moon Cancer

(It is interesting to note in the book “The Secret Architecture of our Nation’s Capitol” by Ovason that astrology was used in setting the cornerstones of famous buildings like the White House. There is a strong suggestion based upon astrological symbols all over Washington DC that there is a strong Virgo emphasis.)

General information on location astrology for you:

EARTHLINES™ Maps Consultation (AstroCartoGraphy®)

Locating Your Personal Power Zones on Planet Earth

Find *your* best places for Relocation, Travel, Romance, and Career

EARTHLINES™ Geographical Astrology gives you a tool that you will use for the rest of your life, *even if you never leave home!* Knowing your personal planetary action zones helps you to make life choices whether you are relocating, vacationing, seeking spiritual retreat, or doing business in other localities.

The maps require fairly accurate birth time, within 15 minutes is best. If you do not have your birth time, you can often order a copy of the “long form” of your birth certificate from the record holding department of the city or state where you were born. Be sure to ask for the complete detail of the birth rather than just the certificate because the certificate does not always contain the birth time.

The maps have vertical lines which are the major power lines and have an effective range of 300 miles east or west of the line. There are also subtle lines called “parans” which show the subtle energy difference of places approximately 100 miles north or south of each other. For example, it may occur that the same major power line (s) runs through both Portland, Oregon and San Francisco. The difference between

these places would be seen in the different paran lines. Of course, you must take into consideration that San Francisco and Portland are very different in appearance, climate, and other external factors.

The consultation looks at your power lines for the entire planet, and about 80% of the information will be good for the rest of your life. You can provide up to three locations that you would like even more detail on (although there is plenty of detail to begin with). Just keep in mind that there will not be much difference in places that are close together, like Washington DC and Baltimore. **Illusions:** Some people expect to find the one place on the planet that will give them everything. Of course, the only place that occurs is by travelling within. In terms of physical location, some power lines are better for career, others for relationships, and so forth.

Couples: Each person needs their own consultation. Power line maps are personal. Some couples match up to the same location, others do not. When you order your individual consultations at the same time, I offer an experimental map called a "composite." I offer this additional map at no charge, but ask that you fill out a research form after you have travelled together to help me research the value of the map. The map shows power lines for the two of you operating as ONE. Accurate birth time is critical for this map.

The lines on your major maps are good for life. Even people who have had a map done many years ago can benefit due to technological advances. I now include asteroids and soul destiny-oriented node lines.

There are also temporary maps called transits and progressions which are good from a matter of weeks to a full year. These maps tell you what energy is passing through an area for you personally at a given time. If you have a specific time that you will be travelling, I can run a transit and progression map for that time period. If not, I normally run a map for the USA (for USA residents) for about 1 month after the appointment.

There is also a relocation map called Local Space. It is your personal feng shui map. The map looks like a wagon wheel with spokes emanating from the center. You can use it to choose a restaurant for an important meeting, to plan a trip around someplace like Europe, and even to arrange furniture in your home or office.

The consultation is a full 1½ hours, and there is even a lot more that I could provide in future sessions if you are an information junkie. **BIRTH TIME IS CRITICAL TO THIS CONSULTATION.** You can write away to county, state, or hospital records for the long form of your birth certificate to get the detailed information (if it is not already on your birth certificate). Although the intuitive side of your brain is always needed, this consultation is packed with information and is highly left-brain analytically focused.

Hopeful, I was able to get to most of your questions here. There are also some graphics and additional information at my website: www.astromark.us

If I can answer any other questions, please give me a call or email.

Terms associated with Relocation Astrology

Mundane Astrology: Astrology is similar to the medical profession in that there are specialties within the larger field. A heart surgeon and a neurosurgeon are both medical doctors, but in different areas of specialization. Mundane astrology is a broadly defined topic that includes relocation, or locational, astrology. Mundane astrology deals with the astrological energy of countries, companies, world leaders, and world events (like the tsunami in SE Asia or the meaning of the next Mercury retrograde cycle for the greater collective of humanity.)

Relocation (Locational) Astrology: This is the broadly defined topic within mundane astrology that studies personal power zones for individuals and companies on planet earth. AstroCartoGraphy® (ACG) or EARTHLINES™ are names for this service (just like Reiki and Yuen Energetics are names for different healing modalities.) AstroCartoGraphy® was commercially developed by Jim Lewis and shows known action zones for planets in your natal chart as mapped onto the earth. EARTHLINES™ is a trade name developed by Mark Dodich. It is a packaged service that includes ACG lines, moving lines called transits and progressions, Local Space, and more). The idea is that your natal chart is projected out onto the earth in known action zones of the chart. It is like what Hermetic philosophers would call “As above, so below.” You are projected out on a global level and certain energies are more powerful there than they might be somewhere else. The reason that accurate birth time is required is that this service uses the “angles” of the chart (Ascendant, MidHeaven, IC nadir, and Descendant)

Email a request for Mark Dodich’s FREE ASTROLOGY PRIMER if you would like an explanation of these points mark@astromark.us

Relocated chart: If you were born in New York and now live in San Francisco, your natal chart can be re-cast, or relocated, to pretend you were born in your new home. This does not replace your natal chart. It simply adds a differently flavored influence to your life experience. If you put on rose-colored glasses, it would not change what you see. What you see would simply be shaded differently. Generally speaking, you almost need to change time zones to change your chart to any significant degree.

Local Space Astrology: This is the locational astrology of movement. If you had your AstroCartoGraphy® chart done by a mail order service, you do not have this. There are a couple different ways to draw it. Mark Dodich uses a method that looks like the center of a bicycle wheel with numerous “spokes” going out in all directions. You use this map to pick a restaurant, locate personal services like a health club or tax advisor, or even to bop around Europe. The idea is that when you travel on lines that represent the energy you are creating, you are increasing the natural flow of energy that supports what you are doing.

Location Transits and Progressions: The lines on your primary AstroCartoGraphy® or EARTHLINES™ maps (s) are good for life. Of secondary influence are these moving lines that show you temporary energy in a location. If you had to choose between a trip to Denver or a trip to New York, you could look at your transiting and progressing lines to see which energy supports what you wish to accomplish when you go there. A Venus line might be best for romance or artistic ventures, whereas a Mars line would be better for running a

marathon. A transit map is generally good for a month, longer for outer planets like Neptune and shorter for quick planets like the moon.

Power Lines: On your ACG or EARTHLINES, these are the vertical and curved vertical lines on the map. They are good for life, and considered to be strong 300-350 miles from the line. They are moderate to weak from 350-700 miles away.

Paran Lines: These are horizontal lines of latitude that represent subtle blending energies of two planets or asteroids. ACG calls them "crossing lines." The lines are considered to be valid anywhere from 80-150 miles north or south of the latitude where they are located. So, if you are looking for a good place for relationship and have a major relationship Power Line in Moscow but no desire to live in Russia, you could find subtle paran lines that support relationships in a country that you would like to live in.

Fixed Star Location Astrology: The ancients were more focused on the stars in astrology than the planets. There is a full explanation of this on the Fixed Star page at www.astromark.us There is a method of mapping well-researched stars and putting them onto a regional map (USA, Europe). Mark Dodich's research suggests that the location of the fixed stars in your natal chart as well as on the maps are best understood by looking at your place in the larger collective. The stars help you go beyond your smaller issues of love, money, or that new car. They help you go beyond our local solar system to see the bigger picture in life. Although these maps are not a part of your EARTHLINES consultation, they can be purchased separately by mail order. See www.astromark.us Not available at this time.

Where is the best place for me to be? I want it all- romance, money, spiritual service, real chocolate with no calories, etc. Obviously, the answer is that you must go within to find that perfect place. Moving to different locations can give you a fresh perspective on life, it can help you get free of preconceived notions that others may have about you, and it can help you emphasize specific areas of your chart. However, you take your life lessons with you wherever you go. It is also important to be careful of making sweeping statements about particular power lines. While a Venus line may help you with your love and money, you must still work through any limiting beliefs about love and money. Going to a Venus line can amplify your need to work through those issues, but it will help you. You must also consider that if you have a gentle Venus line, but the Venus in your natal chart is harshly connected to death & destruction Pluto, then you are going to be required to release some belief or behavior when you go to that seemingly nice Venus line. Life is about spiritual growth and opening to the God within our Being. Picking the right location can help you open to certain aspects of your Divine Nature.

There are a variety of books on the topic of Relocation Astrology including:

The Psychology of AstroCartoGraphy by Jim Lewis and Kenneth Irving
Planets in Locality by Steve Cozzi

And last but not least: Mark Dodich provides a free quarterly postal newsletter called ASTROMARK. Provide your physical mailing address and it will be sent to you for about 1½ year. If you have a consultation or attend a class, the newsletter continues to come at no charge as long as you keep your address current. If you do not get a consultation or attend a class, the newsletter continues to be free but you need to advise Mark about

every 1½ year that you still want to be on the mailing list. This helps the environment and helps keep the cost down. The newsletters cost about 65 cents to mail now, so your help in only taking it while it is useful to you is appreciated. International people need to send a donation to help with costs. Of course, all donations to the newsletter fund are appreciated.
